IGNITION INTERLOCK

CBSC1-RC

What is an ignition interlock device?

An ignition interlock device, or car breathalyzer, is installed into a vehicle to help prevent drunk driving. The device requires the driver to provide a breath sample before starting their car and if a measurable amount of alcohol is detected, the vehicle will not start.

5 reasons to choose Intoxalock:

- 1 Easiest to use device
- 2 Most reliable technology in the industry
- 3 Convenient locations
- 4 Affordable pricing
- 5 Second-to-none in customer service

*More 5-star reviews than any other ignition interlock provider (TrustPilot)
